Professional Summary

- **1+ years of professional experience in developing projects using ASP.Net MVC, Web API, Azure, Angular 5, MS SQL, Entity Framework.**
- **Good working experience in Azure which includes Azure Service Bus and Azure Function.**
- **Having good knowledge on Web Apps, Web Jobs, Redis Cache, Virtual Machine, Storage Account, Service Fabric and Logic Apps.**
- **Quick learner, self-motivated, good team player.**

Work Experience

- **Working as an .Net Developer for Affluent Global Services Pvt. Ltd., Hyderabad from March 2017 to till date.**

Project Experience

1. E-Commerce App

Jan 2018 - Feb 2018

Employer: Affluent Global Services.

Role: Consultant.

Source control: Git

Description: The E-Commerce app is a Commercial Shopping application in which customers can buy the products.

Environments: ASP.NET MVC, Web API, AngularJS, Azure Services like Azure Sql, Storage Account, Cosmos db, App Service.

2. Integrated Compensation Environment [ICE]

Oct 2017 - Dec 2017

Employer: Affluent Global Services

Client: Microsoft(HP)

Role: Consultant

Team Size: 18

Source control: TFS-Git

Description: HP wants to replace its Sales Compensation solution. The current solution is old and legacy, is leaking sales credit, has long lead time to process credits and requires abundant resources to run (business and IT people as well as hardware due to its cumbersome IT sequences and heavy amount of data needed: 100 TB). HP estimates to be able to improve drastically the SLA, reduce its TCO by 50% in the next 2 years (from \$10M/year) by changing the technology, outsourcing the business resources and simplifying the process.

My Roles and Responsibilities:

- Involved in Core Development Modules.
- Developed forms using Javascript, Kendo UI, Knockout JS, Bootstrap, HTML5, CSS3.

- Developed middleware Data-Transfer code from Web API to Database.
- Unit Testing and Bug Fixing.
- Implemented API Management, Service Bus and Web Jobs.

Environment:C#, MVC, Asp Net Core, Entity Framework, Redis, Azure Service Bus, Azure Web jobs, Azure API Management, LINQ, Sql Server, Web API, SignalR API, jQuery, Kendo UI, Requirejs, Knockout JS, Bootstrap, SQL Server and Visual Studio.

Fellowship Engineer at BridgeLabz Solutions LLP

March 2017- Oct 2017

1. Fundoo Notes Web App Development

Technology Stack:HTML5 Canvas, AngularJS 1.x, AngularJS Material, Notifications.

Functional Insight: Developed as Single Page Application in WebApp and Web API, by note taking and it can be added with images and text, reminder option allows to setup the date time to popup the note, ability to give Color Codes, Archive, Trash, and Recover Notes.

Environment: Azure Cloud PaaS - Web App Service.

2. Clinic Admin WebApp Development

Technology Stack: HTML, CSS, JavaScript, jQuery, ASP.NET,, ADO.NET, C#, SQL Server, Log4Net.

Functional Insight: The clinic administration app enables taking appointment with the doctor and to show the diagnostic information of the patient.The App supports three different roles that of Admin, Doctor and Patient.

Environment: Client/Server - .NET Framework , Web - IIS , Database - SQL Server .
